

MTM
ELECTRIC TRAINS®

2006 READY-TO-RUN
SETS & ACCESSORIES

WHO IS M.T.H.?

A DREAM COME TRUE

M.T.H. Electric Trains is the realization of a boyhood dream. In 1980, college student Mike Wolf, already an eight-year veteran of the model train industry, opened a mail order train business in a spare bedroom of his parents' home. Armed with a separate phone line and a fancy new device called a FAX machine, Mike processed and shipped orders, worked train shows on weekends, and worked for Williams Reproductions, a fledgling model railroad manufacturer.

Three years later, Mike's Train House, as the business was called then, made the leap into manufacturing by offering reproductions of tinplate metal trains popular in the 1920s and '30s. Sheet-metal parts were stamped in Minnesota, shipped to Maryland where they were painted by a high-school friend of Mike's

in his parents' garage, and assembled in the Wolf family's basement.

Mike's experience and expertise in manufacturing toy trains led to projects with Lionel® and other O-gauge model railroad firms, and eventually he began to devote himself to manufacturing full

time. In 1993, M.T.H. Electric Trains introduced its own O gauge product line with a scale-detailed diesel, and followed that up with dozens of realistic diesel, electric, and steam locomotives that had never been offered to the O gauge market.

RAILKING SETS FOR BEGINNERS

In 1995 the first RailKing products were introduced. Aimed at beginners and at hobbyists who prefer more traditional-sized toy trains, lower-cost, less-detailed RailKing models offer the same outstanding quality as more expensive scale-sized M.T.H. Premier engines and rolling stock. Mike Wolf has always recognized that a child's first train set represents the best hope for perpetuating our hobby, and RailKing train sets represent our commitment to making your introduction to model railroading a great experience.

COMMITMENT TO SERVICE

We think one of the true measures of a company's attitude toward its customers is how easy it is to get parts and service. Over the past five years, we've worked to build a network of service centers across the United States, with the

goal of enabling virtually any customer to walk into a local hobby shop and have MTH products serviced by a factory-trained technician.

Of course, we also maintain a fully staffed warranty repair department at our Columbia, Maryland headquarters, as well as an extensive parts inventory. We think nobody in the hobby can match our parts availability or our commitment to providing service at the hobby shop level.

In over a quarter-century of operation, Mike's Train House and M.T.H. Electric Trains have cataloged nearly 10,000 separate items. While much of our product line is made for experienced hobbyists, we also believe we make the finest entry-level O gauge train sets you can buy - because in the long run, train set customers are the future of our company. "Skimping on train set value is akin," Mike is fond of saying, "to slamming the door on a customer. By making that first experience one of quality, value, and fun, I believe we open the door to creating a model railroader for life."

M.T.H. TRAINS ARE MORE FUN

M.T.H. trains are more fun because they portray the sights and sounds that make real trains dramatic and exciting.

GREAT SMOKE

Our steam engines feature fan-driven ProtoSmoke™, the most powerful smoke system in the hobby.

VIVID ENGINE SOUNDS

Proto-Sound features digital recordings with CD-quality playback: the wail of a diesel horn; the melody of an authentic steam whistle; the bell alerting passengers to your arrival or departure; and diesel roar or steam chuff that vary automatically depending on how hard your engine is working.

STATION SOUNDS

Proto-Sound passenger engines offer Passenger Station Proto-Effects™, a complete arrival and departure sequence that you can activate from your transformer. Freight engines include Freight Yard Proto-Effects™, a symphony of freight terminal sounds.

REMOTE UNCOUPLING

Proto-Sound steam and diesel engines offer remote uncoupling anywhere on your layout, accompanied by the clank of the coupler opening and the hiss of air hoses parting.

SPEED CONTROL

Many toy trains have two speeds: fast and faster. Most M.T.H. locomotives feature Proto-Sound® 2.0, our unique sound and control system that allows our engines to throttle down to a slow crawl, highball down the main line, or maintain any speed in between. The Proto-Speed Control™ built into Proto-Sound® 2.0 acts like the cruise control on a car, keeping your train moving at the speed you select, regardless of hills and curves.

SYNCHRONIZED CHUFF AND PUFF

Like a real steam engine, M.T.H. steamers feature puffs of smoke and steam chuff sounds synchronized with the drive wheels. Better than any other toy train, an M.T.H. locomotive portrays the drama of a steam engine s-l-o-w-l-y chuffing and puffing as it pulls out of a station and gets up to speed.

ON THE COVER

1. Engine Shed (30-9030),
2. Trackside Yard Tower (30-90006),
3. 12-Piece Railroad Worker Figure Set #12 (30-11066),
4. Freight Transfer Warehouse (30-9098),
5. Grainery (30-90026),
6. PRR R-T-R Freight Set (30-4136),
7. "O" Scale Operating Block Signal (30-11005),
8. Telephone Pole Set (30-1088),
9. Anheuser-Busch Lighted Billboard (30-90107),
10. 32 Pack Vehicle Set (30-50031)

WWW.MTHTRAINS.COM

O GAUGE IS MORE FUN!

Model trains come in a variety of sizes. Smaller sizes such as HO gauge and N gauge allow hobbyists to fit a lot of highly detailed railroad into less space. But we think O gauge - the traditional size for train sets for more than half a century - is the perfect size for a child's first electric train. Judging by the rising popularity of O gauge over the past two decades, it has become the perfect size for many adults as well. Standing about twice the size of HO trains, O gauge trains are more fun because:

They stay on the track: O gauge trains hold the track better at the high speeds that children often prefer, thanks in part to the larger flanges on O gauge wheels.

They're easy to handle: The larger size of O gauge trains makes them easier for children to handle than smaller-gauge trains - and much easier to place on the track.

They're impressive: Size and weight make an O gauge train a memorable toy. M.T.H. steam engines feature die-cast metal boilers and frames, M.T.H. diesels feature die-cast trucks, and all M.T.H. products have metal

wheels and couplers. If you're looking for a toy that will make a long-term impression on a child, it's hard to beat an O gauge train.

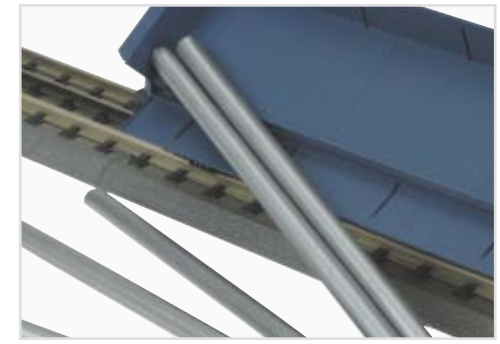

They do things: As seen on this page and elsewhere in this catalog, O gauge offers a variety of operating, animated cars and accessories that is unmatched by any other scale or gauge.

LOAD YOUR COAL TRAIN WITH THIS **OPERATING COALING TOWER**; MORE INFO ON PAGE 48.

THIS **DRIVE-IN DINER** WITH ANIMATED CARHOPS LIGHTS UP THE NIGHT; SEE PAGE 54.

DROP OFF FREIGHT WITH THIS **OPERATING DUMP CAR**; MORE DETAILS ON PAGE 10.

QUALITY AND VALUE COMPARE BEFORE YOU BUY

At M.T.H., we consider the ready-to-run train set our best opportunity to make a great impression on any newcomer to the wonderful world of model railroading. That's why we don't skimp on the quality and value you'll find in every RailKing® and Tinplate Traditions® ready-to-run starter set. Compare our sets with those from our competitors and see what makes M.T.H.'s starter sets the best way to start your model railroading journey.

EVERY RAILKING CAR AND LOCOMOTIVE FEATURES DIE-CAST METAL TRUCKS AND COUPLERS.

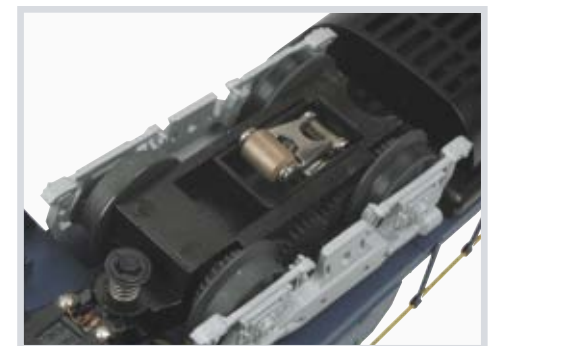

EVERY RAILKING READY-TO-RUN TRAIN SET INCLUDES TRACK, TRANSFORMER, INTERACTIVE DVD WITH TRACK LAYOUT SOFTWARE AND OPERATOR'S MANUAL.

Every RailKing ready-to-run set features RealTrax®, O Gauge's first and most complete line of snap-together track with built-in roadbed. Only RealTrax uses solid metal track rails instead of cheaper hollow rails that can bend if stepped on. See the complete RealTrax® line beginning on page 38.

EVERY RAILKING PASSENGER CAR HAS A DETAILED, LIGHTED INTERIOR.

EVERY RAILKING LOCOMOTIVE FEATURES DURABLE METAL GEARS, WHEELS, AND AXLES

Every 2006 M.T.H. Train set* features a U.L. approved 100-watt or stronger transformer to ensure your set has enough power now and when you expand it with extra cars, track and accessories.

* Trolley Sets feature a 40-watt transformer

THE HIGHEST QUALITY TRAIN SETS YOU CAN BUY

Atchison Topeka & Santa Fe - 3-Car Overton Passenger Coach Set
30-6418 \$129.95

- Set Features**
- Die-Cast Steam Locomotive
 - 3-Car Freight Consist
 - 31" x 51" 12-Piece RealTrax® Oval
 - Z-1000™ Transformer With Controller
 - Lighted Track Lock-On
 - RailWare™ Interactive DVD With Track Layout Software

- Locomotive Features:**
- Die-Cast Boiler and Chassis
 - Flywheel-Equipped Motor
 - Locomotive Speed Control
 - Operating Headlight
 - Remotely Controlled Proto-Coupler™
 - Synchronized Puffing Proto-Smoke Unit
 - All-Metal Wheels and Axles
 - Proto-Sound® 2.0 Sound System Featuring Freight Yard Proto-Effects™
 - Locomotive Measures: 19 1/4" x 2 1/2" x 3 3/4"

At the turn of the 20th century, the railroad landscape was filled with large-wheeled steam locomotives with huge funnel-shaped smoke stacks. First appearing in the 1870s, these 4-6-0 steam engines were some of the railroads' most favored designs until the early 1900s. Specializing in both freight and passenger use, these magnificent engines helped America expand westward while moving thousands of passengers and hauling tons of freight.

Although long gone, the spirit of these engines can be revived with this magnificent 4-6-0 freight set that features a heavy 4-6-0 die-cast metal steam engine heading up a three-car freight consist. Decorated in colorful Atchison Topeka & Santa Fe livery, the locomotive is equipped with all-metal gears, wheels and axles to ensure a lifetime of fun.

The unique sounds of Proto-Sound 2.0 will amaze your friends and family. Imagine their faces when the whistle wails or the exclusive Freight Yard Proto-Effects simulate the loading and unloading for freight - just as if you were right there in the freight yard! Of course, seeing the synchronized puffing smoke from the locomotive as it pulls its three-car freight consist with die-cast metal trucks and operating metal couplers is even more impressive and tells all who see it that this is one great set. As with all RailKing Ready-to-Run sets, the 12-piece RealTrax oval assembles in minutes and can be placed right on the carpet or floor for a quick, temporary layout.

- Freight Cars Feature:**
- Intricately Detailed Durable ABS Bodies
 - Die-Cast 4-Wheel Trucks
 - Operating Die-Cast Metal Couplers
 - Colorful, Attractive Paint Schemes
 - Fast-Angle Wheel Sets
 - Needle-Point Axles
 - Metal Wheels and Axles
 - Each Car Measures Approximately: 13 3/4" x 2 1/2" x 3 1/2"

FROM THE CLASSIC
TV SHOW!**

Rudolph The Red-Nosed Reindeer® - 2-8-0 Steam Train Set

- 30-4173-1 Proto-Sound® 2.0 \$349.95
- 30-4173-0 Loco-Sound™ \$279.95

Loco-Sound™ engines are equipped with transformer activated bell and whistle sounds only.

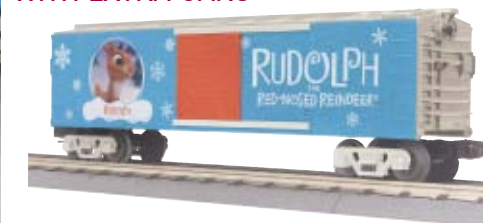

FIGURES ARE NOT INCLUDED

A train set is a great way to start your family's model railroading tradition and our RailKing Rudolph The Red-Nosed Reindeer® set might be your perfect choice. The locomotive is decorated in red & black colors and sports a red headlight guiding Santa's train through the countryside. This creative adaptation of a 2-8-0 Consolidation locomotive features a heavy all-metal steam engine boiler and chassis that feels as strong as it runs. The all-metal gears, wheels and axles will ensure a lifetime of fun and the unique sounds of Proto-Sound® 2.0 will amaze your friends and family.

Imagine their faces when the whistle wails or the exclusive Rudolph Proto-Effects™ begin playing sound clips from one of television's most timeless Christmas shows. Of course, seeing the synchronized puffing smoke from the locomotive as it pulls its three distinctive freight cars — each equipped with sprung die-cast metal trucks and operating metal couplers — is even more impressive and tells all who see it that this is one great set. As with all RailKing® Ready-to-Run sets, the 12-piece RealTrax® oval assembles in minutes and can be placed right on the carpet for a quick, temporary layout.

CHRISTMAS ACCESSORIES

AUTOMATIC BUMP-REVERSE

While our trolley sets come with a circle of track, their bump-reverse feature allows continuous point-to-point operation as well. The trolley automatically reverses direction each time it hits a bumper.

(For additional RealTrax and lighted bumpers, see pages 38-41.)

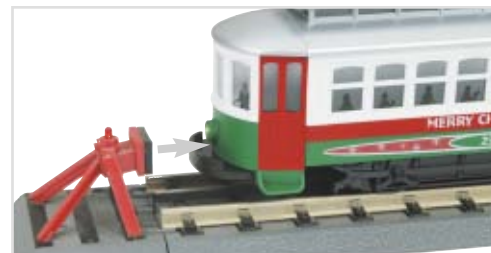

Christmas - Trolley R-T-R Train Set
30-4172-1 \$119.95

Christmas - Bump-n-Go Trolley
30-2583 \$59.95

Introduce someone you love to model railroading with the magic of a RailKing® Ready-To-Run trolley set, or take advantage of the way it complements your holiday decor when set up around the Christmas tree.

The colorful trolley features a lighted interior, metal wheels and gears, and a long-lasting motor. The unit operates on any O Gauge track system including the easy-to-assemble RealTrax system found inside each set. Optional track bumpers can be added to take advantage of the Automatic Bumper Reversing Mechanism (ABRM) that changes the trolley's direction each time it hits a track bumper.

- Trolley Set Features:
- Operating Trolley Car
 - RailWare™ Interactive DVD With Track Layout Software
 - 31" diameter 8-Piece RealTrax circle
 - ZDC Transformer With Controller
 - Lighted Track Lock-On

- Trolley Features:
- Detailed ABS Body
 - Powerful Motor
 - Automatic Reversing Bumpers
 - Operating Headlights
 - Moveable Power Pole
 - Lighted Interior
 - All-Metal Wheels and Gears
 - Measures: 8 1/4" x 2 3/8" x 3 1/3"
 - Operates On O-27 Curves

RailKing operating freight cars add a new dimension and excitement level to your O Gauge layout with realistic action and quiet, smooth operation.

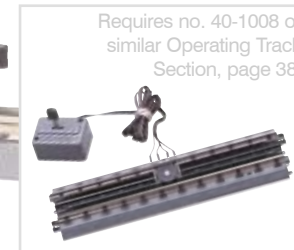

Like most M.T.H. operating cars, the Signaling Santa car comes to life when parked on an operating track section. When the track section is activated, the car door slowly slides backward followed by Santa Claus himself leaning out of the car with his lighted signal lantern aglow.

You can see many of the M.T.H. operating cars in action the next time you visit the M.T.H. website (www.mthtrains.com). Just click on the Video Link located right on the home page.

Christmas - Operating Box Car w/Signaling Santa
30-79141 \$59.95

DOOR OPENS BY REMOTE CONTROL AND SIGNALING SANTA POPS OUT, WAVING LIGHTED LANTERN.

Requires no. 40-1008 or similar Operating Track Section, page 38.

 - Operating Die-Cast Metal Couplers
 - Colorful, Attractive Paint Schemes
 - Decorative Brake Wheels
 - Unit Measures: 11 1/2" x 2 3/8" x 2 5/16"
 - Operates On O-27 Curves

ANHEUSER-BUSCH 2-8-0 STEAM

Anheuser-Busch - 2-8-0 Steam Train Set
30-4155-1 w/Proto-Sound® 2.0 \$349.95

Who says model trains are just for kids? This beautifully decorated "adult collectible" train set is a great way to begin your own model railroading tradition and comes fully equipped with a load of features that are sure to entertain. Decorated in black & red Anheuser-Busch livery, this creative adaptation of the 2-8-0 locomotive features a heavy all-metal steam engine boiler and chassis that feels as strong as it runs. The all-metal gears, wheels and axles will ensure a lifetime of fun and the unique sounds of Proto-Sound® 2.0 will amaze your friends and family.

Imagine their faces when the whistle wails or the exclusive Anheuser-Busch Proto-Effects™ begin playing the classic Budweiser theme song. Of course, seeing the synchronized puffing smoke form the locomotive as it pulls its three distinctive freight cars — each outfitted with sprung die-cast metal trucks and operating metal couplers — is even more impressive and tells all who see it that this is one great set. As with all RailKing® Ready-to-Run sets, the 12-piece RealTrax® oval assembles in minutes and can be placed right on the carpet or floor for a quick, temporary layout.

Created by an act of Congress in 1914, the Alaska Railroad was owned and operated by the U.S. government until 1985, when the State of Alaska became the railroad's new owner. The railroad helped develop the state's economy and played a strategic role in World War II. It continues to thrive today, carrying lumber and petroleum products out of the Alaskan wilderness to the state's southern ports, and giving tourists - more than a half-million of them a year - great views of Alaska's majestic beauty.

Recreate the excitement of this wilderness railroad with this hard-working M.T.H. diesel set featuring three colorful, highly-detailed cars. With its twin flywheel-equipped motors and rubber traction tires, the Alaska Railroad SW-1500 diesel is ready for the heaviest trains on your railroad. For even more fun, add a heavy-duty snowplow in front of the engine or an operating dump car behind it. As with all Proto-Sound 2.0 locomotives, the Alaska RR diesel offers amazing slow speed capability, Proto-Speed cruise control at all speeds from a crawl to full throttle, and a wide range of dramatic railroad sounds.

- Freight Car Features:**
- Intricately Detailed Durable ABS Bodies
 - Die-Cast 4 or 6-Wheel Trucks
 - Operating Die-Cast Metal Couplers
 - Colorful, Attractive Paint Schemes
 - Fast-Angle Wheel Sets

The three facilities of U.S. Steel's Mon Valley Works create sheet steel for everything from cars to refrigerators to metal buildings. Mon Valley trains carrying molten metal serve the blast furnaces of the Edgar Thomson Plant, located southeast of Pittsburgh. Steel slabs from Edgar Thomson are sent by rail to the nearby Irvin Plant where they are rolled into sheet products of all types, and to the Fairless Plant outside Philadelphia that produces galvanized sheets.

Bring the excitement of heavy industry to your railroad with this hard-working train that celebrates America's industrial heritage. With its twin flywheel-equipped motors and rubber traction tires, the Mon Valley Works SW-1500 diesel is ready for the heaviest loads of molten or finished steel. For even more fun, add a slag car to serve blast furnaces or an operating dump car for coal or steel pipe. As with all Proto-Sound 2.0 locomotives, the Mon Valley diesel offers amazing slow speed capability, Proto-Speed cruise control at all speeds from a crawl to full throttle, and a wide range of dramatic railroad sounds.

SANTA FE F-3 DIESEL

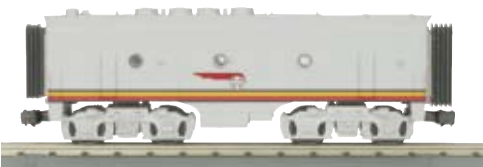

Santa Fe - F-3 Diesel Passenger Train Set
30-4142-1 w/Proto-Sound® 2.0 \$329.95

EXPAND YOUR SET WITH EXTRA CARS

Put your railroad to work with this classic Santa Fe Ready-To-Run diesel passenger set. Bearing the markings of one of America's most famous railroads, this set makes a great beginning for any family's first model train.

The Santa Fe F-3 diesel's classic warbonnet livery houses the locomotive's powerful 2-motored chassis. Outfitted with all-metal wheels and gears, the engine runs as good as it looks and comes equipped with digital sound and revolutionary speed control features found only in RailKing Ready-to-Run train sets. Included are three well detailed brightly painted passenger cars, each outfitted with a detailed, lighted interior and all-metal trucks, operating couplers, and metal wheels and axles ensuring years of fun operation.

A classic freight set is a great way to start your family's model railroading tradition and the Pennsylvania 2-8-0 Consolidation set makes a great beginning. Decorated in near-black Pennsylvania Brunswick Green, this creative adaptation of the 2-8-0 features a heavy all-metal steam engine boiler and chassis that feels as strong as it runs. The all-metal gears, wheels and axles will ensure a lifetime of fun and the unique sounds of Proto-Sound 2.0 will amaze your friends and family.

Imagine their faces when the whistle wails or the exclusive Freight Yard Proto-Effects begin playing the sounds of a busy freight yard. Of course, seeing the synchronized puffing smoke from the locomotive as it pulls its three distinctive freight cars with sprung die-cast metal trucks and operating metal couplers is even more impressive and tells all who see it that this is one great set. As with all RailKing Ready-to-Run sets, the 12-piece RealTrax oval assembles in minutes and can be placed right on the carpet or floor for a quick, temporary layout.

 - Locomotive Measures: 19 1/4" x 2 1/2" x 3 3/4"

The Baltimore & Ohio railroad was America's oldest railroad, stretching from the East Coast to the Mid-West and South, providing an important link for both coal and passenger traffic during its peak years. In fact, its first railroad station, America's oldest, was located in Ellicott City, Maryland, just a few minutes from M.T.H.'s headquarters. The original structure still stands today, serving as an annex of the B&O Railroad Museum.

Although long gone, the B&O continues its popularity among model railroad fans today, who continue to appreciate its colorful passenger train consists like that seen in our 2006 set, headed up by a near-scale 2-8-0 locomotive that comes outfitted with all-metal gears, wheels and axles to ensure a lifetime of fun.

The unique sounds of Proto-Sound® 2.0 will amaze your friends and family. Imagine their faces when the whistle wails or the exclusive Passenger Station Proto-Effects™ begin calling out the next station stop on the line - just like the real stations! Of course, seeing the synchronized puffing smoke from the locomotive as it pulls its three-car passenger consist with die-cast metal trucks and operating metal couplers is even more impressive and tells all who see it that this is one great set. As with all RailKing® Ready-to-Run sets, the 12-piece RealTrax® oval assembles in minutes and can be placed right on the carpet or floor for a quick, temporary layout.

Introduce someone you love to model railroading with the magic of a RailKing® Ready-To-Run trolley set or take advantage of the way it complements your own holiday decor when set up around the Christmas tree.

The colorful trolley features a lighted interior, metal wheels and gears and a long-lasting motor. The unit operates on any O Gauge track system including the easy-to-assemble RealTrax system found inside each set. Optional track bumpers can be added to take advantage of the Automatic Bumper Reversing Mechanism (ABRM) that changes the trolley's direction when it hits a track bumper.

NEW YORK CENTRAL 260E O-GAUGE STEAM SET

**EQUIPPED WITH
REMOTELY OPERATING
"BOX-TYPE" PROTO-COUPLER™**

New York Central - 263E Steam Freight Train Set
10-3021-1 w/Proto-Sound® 2.0 \$599.95

**EXPAND YOUR SET
WITH EXTRA CARS**

Like its standard gauge cousins on the following pages, this O gauge New York Central steam set embodies the gleaming sheet metal beauty of the tinplate era. The original 260E locomotive, introduced by Lionel® in 1936, represented the last hurrah of tinplate. Within a few years, most toy trains would be far more realistic - if less charming - plastic and die-cast models of real-life trains.

While it harks back to the decades before World War II, this tinplate freight set runs on the same O gauge RealTrax® as every RailKing® model. And while its exterior is pure 1930s, thanks to Proto-Sound® 2.0 electronics our 260E steamer delivers smoother operation than any original tinplate locomotive, as well as huge plumes of puffing smoke - timed to the driver's revolutions - and a clanging bell and wailing whistle guaranteed to delight children of all ages. Our replica of the 260E is outfitted with an all-new "Box-Type" Proto-Coupler™ that can be remotely activated by the transformer to uncouple from its trailing three freight cars, each decorated with bright metal trim and colorful baked enamel paint.

WHAT IS TINPLATE?

Popular from the early twentieth century until the beginning of World War II, tinplate trains were the product of an era when toy trains indeed looked like toys, and prototype accuracy was less important than artistry and bright colors. Like the originals, M.T.H. Tinplate Traditions models are made of stamped and die-cast metal and finished in bright metal plating and shiny baked enamel paint - enabling you to enjoy the same excitement that a child felt when receiving these toys as a holiday or birthday present seven or eight decades ago.

Tinplate Traditions trains come in two sizes: O gauge, like the RailKing trains shown elsewhere in this catalog, and Standard Gauge, which is almost twice the size of O gauge and peaked in popularity in the 1920s and 1930s.

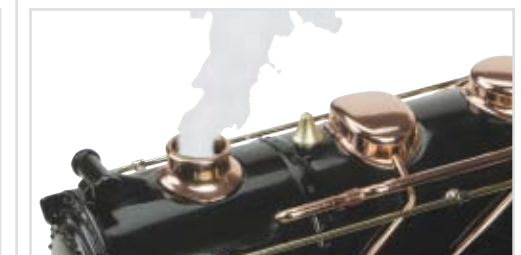

**New York Central - 2800 Series
O Gauge Hopper Car**
10-8023 \$79.95

JERSEY CENTRAL NO. 384 STEAM SET

Jersey Central - No. 384 Steam Passenger Set
10-1251-1 w/Proto-Sound® 2.0 \$599.95

EXPAND YOUR SET WITH EXTRA CARS

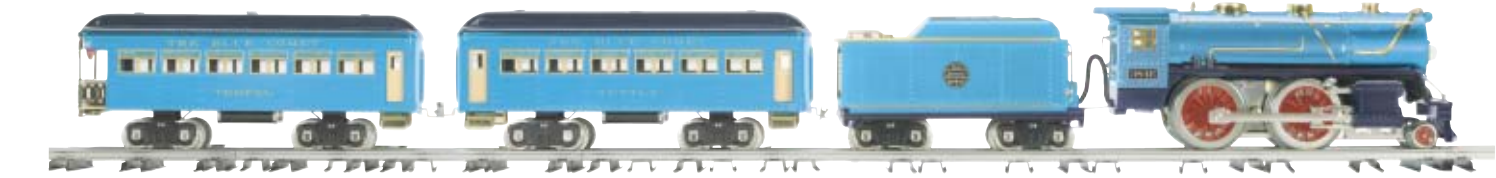

Standard gauge steam engines like the original 384 were not so much scale models of real locomotives, but cartoon-like caricatures: wildly oversized drivers, bright brass or nickel trim, colorful, gleaming paint, and a cast iron frame topped by a sheet metal boiler and cab. Our Tinplate Traditions Jersey Central set replicates the magic of the tinplate trains that gladdened the heart of many a child in the early decades of the 20th century.

The bright colors of this set are inspired by Jersey Central name trains like the Blue Comet, which sped vacationers along the New Jersey shoreline in the early 20th century. Thanks to Proto-Sound® 2.0 electronics, our 384 steamer delivers smoother operation than any original standard gauge locomotive, as well as huge plumes of puffing smoke - timed to the driver's revolutions - and a clanging bell and wailing whistle guaranteed to delight children of all ages. Our replica of the 384 is trailed by two passenger cars decorated with bright metal trim and colorful baked enamel paint.

Jersey Central - 330 Series Passenger Car
10-5060 \$129.95

Today M.T.H. is the only manufacturer offering a full line of standard gauge and O gauge trains that faithfully reproduce the magic of the pre-war tinplate era. See our latest Tinplate Traditions catalog online at www.mthtrains.com.

CHESSIE NO. 384 STEAM SET

Chessie - No. 384 Steam Passenger Set
10-1236-1 w/Proto-Sound® 2.0 \$599.95

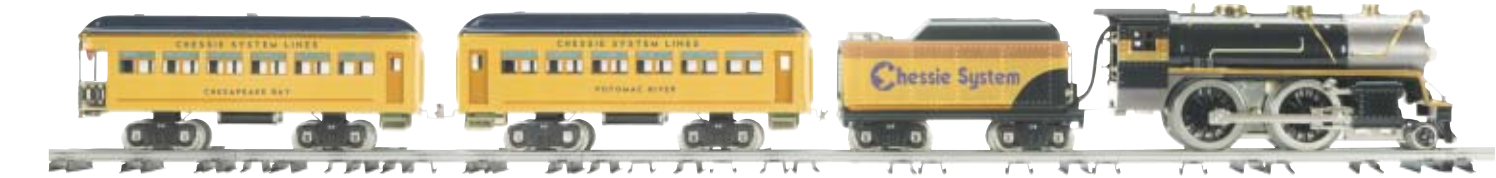

EXPAND YOUR SET WITH EXTRA CARS

In many respects, the No. 384 is the quintessential toy steamer owned by thousands of boys in the early twentieth century: wildly oversized drivers, bright brass or nickel trim, colorful, gleaming paint, and a cast iron frame topped by a sheet metal boiler and cab. Our Tinplate Traditions 384 Chessie set replicates the starter sets that gladdened the heart of many a child in the early decades of the 20th century. The bright colors of this set, however, are inspired by the Chessie Steam Specials run for railfans in the late 1970s.

Thanks to Proto-Sound® 2.0 electronics, our 384 steamer delivers smoother operation than any original standard gauge locomotive, as well as huge plumes of puffing smoke - timed to the driver's revolutions - and a clanging bell and wailing whistle guaranteed to delight children of all ages. Our replica of the 384 is trailed by two passenger cars decorated with bright metal trim and colorful baked enamel paint.

- Die-Cast Metal Chassis
 - Baked Enamel Finish
 - Operating Metal Latch Couplers
 - Metal Wheels, Gears and Axles
 - Stamped Steel Body
 - Locomotive Speed Control
 - Synchronized Puffing ProtoSmoke™ Unit
 - Operating Headlight
 - Proto-Sound® 2.0 Featuring Passenger Station Proto-Effects™
 - Locomotive Measures: 22 3/4" x 7 5/8" x 5"

- Passenger Car Features:**
- Baked Enamel Finish
 - Operating Metal Latch Couplers
 - Metal Wheels and Axles
 - Stamped Steel Body
 - Cars Measure: 14 1/2" x 3 1/8" x 4 3/4"

In many respects, the No. 384 is the quintessential standard gauge steamer owned by thousands of boys in the early twentieth century: wildly oversized drivers, bright brass or nickel trim, colorful, gleaming paint, and a cast iron frame topped by a sheet metal boiler and cab. Our Tinplate Traditions 384 Christmas set replicates the starter sets that gladdened the heart of many a child on a holiday or birthday in the early 1930s - with one exception.

Thanks to Proto-Sound® 2.0 electronics, our 384 steamer delivers smoother operation than any original standard gauge locomotive, as well as huge plumes of puffing smoke - timed to the driver's revolutions - and a clanging bell and wailing whistle guaranteed to delight children of all ages. Our replica of the 384 is trailed by two passenger cars decorated with bright metal trim and colorful baked enamel paint.

EXPAND YOUR SET WITH EXTRA CARS

400 Watts!
The Most Powerful
U.L. Listed
Transformer!

While the power pack that comes with every RailKing Ready-To-Run set provides plenty of power to operate your set & several additional cars, you'll find as you add more track, cars, & accessories to your layout that you need more power to keep everything running. Fortunately, RailKing has you covered.

If you want to power up gradually, you can purchase additional 50-watt Z-500™, 75-watt Z-750™ or 100 watt Z-1000™ transformers as the need arises. Featuring a U.L. approved design, each model utilizes a separate controller which contains bell, horn & direction buttons that can control any manufacturer's locomotives & sound systems including Proto-Sound® equipped steam, diesel & electric locomotives.

If you want to max out your power potential, the 400-watt Z-4000® is the most powerful transformer to receive the UL-listing for the model railroading hobby. The Z-4000 has two separate throttles to let you power two different tracks, & it has two fixed power outputs you can use for operating accessories. A single Z-4000 will power a lot of layout.

DCS users who don't need a conventional transformer and controller can use this 100 watt power supply for small and moderate sized layouts. Featuring a U.L. approved design & separate 14v AC Accessory Port, its robust design will provide years of service. Use the optional TIU/Barrel Jack adapter to make connecting it to the DCS Track Interface Unit quick and easy.

WHY THE U.L. LISTING?
M.T.H. Electric Trains is committed to manufacturing safe, U.L. approved transformers and power supplies. By subjecting our transformers to the strenuous tests and requirements of the U.L. laboratories, M.T.H. helps ensure that these products meet the same requirements as other consumer electronics sold today. When choosing a new transformer, model railroaders should only look for those that have received a U.L. listing.

SIMPLY THE BEST WAY TO RUN A RAILROAD

There is a new way of controlling model railroads today that you've got to see to believe. It's called DCS™ (for Digital Command System) and it's the most revolutionary product to hit model railroading since locomotives first became equipped with sound!

Unlike traditional or conventional means of operating a model railroad, command systems allow the user to independently control each engine even if other engines are on the same track at the same time. The concept has been around since the early 1990's, but only DCS™ makes it simple and easy to use — thanks to its state-of-the art technology and intuitive interface.

Upgrading to DCS unlocks more features than you'll find in any other command control operat-

ing system — features that are factory-installed in every Proto-Sound® 2.0 train set locomotive. Here's just a partial list of what DCS offers:

WIRELESS HANDHELD THROTTLE
Run your whole railroad — locomotives, accessories, everything — from one or more DCS handheld remotes. An LCD screen indicates which engine you're controlling and its current speed, adjustable in one-scale-mile-per-hour increments. Program engines and accessories on the same screen. For nighttime operation, turn on the screen's backlight.

COMMAND CONTROL
Operate up to 99 DCS-equipped engines independently at the same time on the same electrically continuous track — using one or several DCS wireless handheld remotes. When you have guests, give each visitor a DCS handheld and let them control their own engine. Just like

the prototype, you can double-head locomotives, add or drop helper engines, or bring a train into the station with a mainline engine and then have a switcher break up the consist.

PROTO-SOUND® 2.0 ENGINE SOUNDS
DCS offers individual control of dozens of sounds built into every M.T.H. locomotive. Rev the diesel motor up manually before moving your train. Activate auxiliary sounds such as steam letoff and crew conversations. Whistle, bell, and steam chuff or diesel prime mover sounds even have independently adjustable volume control.

TRAIN SOUNDS
Add ambience to your railroad with the variety of train sounds built into Proto-Sound® 2.0. The DCS handheld gives you access to effects such as wheel clickety-clack, coupler opening sounds, and the Doppler effect of a train passing

by. DCS also offers one-button activation of the Passenger Station or Freight Yard Proto-Effects™ built into every Proto-Sound® 2.0 locomotive.

SMOKE CONTROL
Adjust the smoke intensity for a steam or diesel engine at any time from the DCS remote.

CONSTANT LIGHTING
Because DCS operates with a constant voltage on the rails (most operators use 18 volts), engine, caboose, and passenger car lights are always on at a constant intensity. No more "lights-out" when a passenger train arrives at a station!

PROGRAMMABLE OPERATION
Record up to 90 minutes of DCS speed, direction, and sound commands as a program that your engines can repeat on demand. Use this feature to run trains auto-

matically on one part of your railroad while you manually control another area.

UPGRADABLE SOFTWARE
Unlike any DCC or any other command system, DCS is designed to be upgradable over the Internet. The latest software can be downloaded to any DCS system ever made, so new features can be added and your investment will not become obsolete.

TMCC® COMPATIBILITY
Add a Lionel® Command Base to your DCS system and you can run engines equipped with TMCC® (Lionel's TrainMaster® Command Control) side-by-side with DCS engines - all from the DCS handheld controller. If you prefer, you can even use a Lionel CAB-1® handheld to control TMCC engines at the same time you're controlling Proto-Sound engines with the DCS controller.

LISTEN TO YOUR FAVORITE TUNES WITH PROTO-CAST™
DCS is the only command control system that lets you hook up any audio source and play your favorite music right through the train!

BE YOUR OWN DISPATCHER
With DCS's built-in remote microphone, real-time radio dispatch calls are just a button push away.

COMMAND CONTROL EXPLAINED

In conventional operation, an AC or DC transformer varies track current to adjust engine speed and direction. Command systems such as DCS™, however, put a constant voltage on the track (around 18 volts for DCS) and vary speed by telling each engine how much of that voltage to use. Command control allows different engines to do different things - like run at different speeds, go in different directions, or make different sounds - even when they are on the same track.

In the DCS system, commands such as speed, direction, and sound control are sent as radio signals from the handheld throttle to a TIU (track interface unit). The TIU translates those radio signals into digital information that is sent through the rails and picked up by a receiver in the appropriate engine - telling it to go, for example, 37 miles per hour, blow the whistle, smoke more heavily, or any other command. DCS locomotives can also send information back to the handheld to let the operator know what they're doing.

INTUITIVE MENUS ALLOW YOU TO PROGRAM, SELECT, AND CONTROL ENGINES, SWITCHES, AND ACCESSORIES.

- Go to the engine set up menu
- Choose your engine type
- DCS will "look" for Proto-Sound® or TMCC command-equipped engines on your layout. When it finds one, it adds it onto your remote and tells you when it's done.

DCS WIRELESS REMOTE HANDHELD

MTH RealTrax track is superior to our competitors in both durability and electrical conductivity - two of the most important factors in choosing a track system for your layout.

First, MTH RealTrax rails are solid extrusions of nickel-silver. This material provides superior strength, durability, and corrosion resistance when compared to our competitors obsolete approach of using flimsy formed rails made of steel that will rust over time.

Next, MTH RealTrax has spring loaded phosphor bronze contacts that provide superior electrical connections. The contacts are spring loaded to maintain a solid connection over time and are highly resistant to corrosion of any kind. Similar materials are used in many electrical connections around your home such as lamps, battery operated appliances, and electrical outlets. Even our competitors so-called "new" track system still uses the outdated approach of plated steel pins inserted into steel rails for their connection. This obsolete approach is well known to rust and deteriorate into loose and intermittent electrical connections over time.

Imagine the frustration and expense of poor electrical track connections and ultimately having to replace the track on a finished layout!!!

Finally, a track system must have quality switches that can handle the constant wear and stress of locomotives and cars. RealTrax switches feature the same durable solid rails of regular RealTrax sections and utilize long-lasting switch motors that provide precise throws each and every time. Each switch is designed to fit into most configurations and its reverseable motor mechanism quickly snaps onto the other side of the switch in just seconds. No disassembly of the switch is required!

At M.T.H. we believe a track system should allow your model railroad empire to grow. The RealTrax system includes 72 different components for maximum expansion capabilities. Bridges, curves of all sizes, elevated and graduated trestles, crossovers and every straight and curve configuration you'll need to create your own model railroading empire.

ACCESSORIES

Warning signs like our operating crossing gate (complete with ringing warning bell, flashing lights and crossing arm that lowers) and traffic lights keep the townspeople safe. Streetlights and hi-tension towers turn your layout into a real-looking, recognizable town.

M.T.H. offers a variety of RailTown™ buildings to help you create whatever kind of atmosphere you desire: rural or urban, nostalgic or modern. Operating buildings transfer your layout's action from trains to structures adding fun and excitement to the entire pike. RailTown buildings are a perfect addition on any O Gauge layout, as each is sized for use with all O Gauge locomotives and rolling stock.

Many RailKing operating accessories bring a layout to life via real-world movement and operation. In addition to lights and signals there are many operating buildings. An SUV pulling through a McDonald's® drive-thru after ordering, a coaling tower that lifts bucketfuls of coal and dumps them into a waiting hopper car, a fill-up at the local gas station, log operations at the saw mill and much more are awaiting owners of RailKing operating buildings. Each fully assembled and ready to use means your layout transformation into a world of action is just a few minutes away.

As you peruse the next few pages, you'll find that we've divided the accessory section into four categories: RailTown buildings, traditional accessories that feature the classic "Tinplate" look for the mid-20th century, miscellaneous accessories like bags of coal or smoke fluid, and O Scale accessories complete with scale proportioned, well-detailed models that make a layout incredibly realistic.

RailTown Signature Series

RailTown buildings have long been acclaimed for their ease of use, variety and scale details. Pre-assembled and painted, each is ready-to-use right out of the box.

Now, for those looking for a prototypical scale layout, M.T.H. is pleased to offer our all-new RailTown Signature Series buildings that are pre-weathered for an incredibly realistic appearance. Created in partnership with Scale Models, Arts & Technologies, Inc. (SMARTT), each building's distinctive paint scheme was originally designed and crafted by an artist who specializes in creating structures for SMARTT's custom layouts built for private and corporate clients nationwide.

Intricate details like brick mortar, weathered roof lines and sun bleached siding helps make RailTown Signature Series buildings look even more realistic, adding an incredible touch of realism to your model railroad.

Look for an exciting coupon offer from SMARTT in every MTH Signature Series building!

Internal Revenue Service - 3-Story City Building On Fire
30-9156 \$129.95
Unit Measures: 12 3/4" x 6 5/16" x 9 3/16"

Fireman squirts real water on flickering "flames" as smoke billows from building.

OPERATING McDONALDS®

Recreate one of America's most popular modern-day restaurants with this unique and fun to operate accessory.

Fully assembled and painted, the accessory hooks up in minutes to any AC transformer. Activation occurs with just a touch of a button at which point the included SUV begins circling the structure stopping first to place an order and then a second time to pick-up the food. Audio features include the sounds of different customers ordering for a sense of variety and background car radio music for an added touch of realism.

FEATURES:

- ABS Construction
- Fully Assembled & Painted
- Interior Illumination
- Automatic Operation & Digital Sound Effects
- Die-Cast 1/43 Scale SUV Included
- Unit Measures: 17" x 17" x 7 3/4"

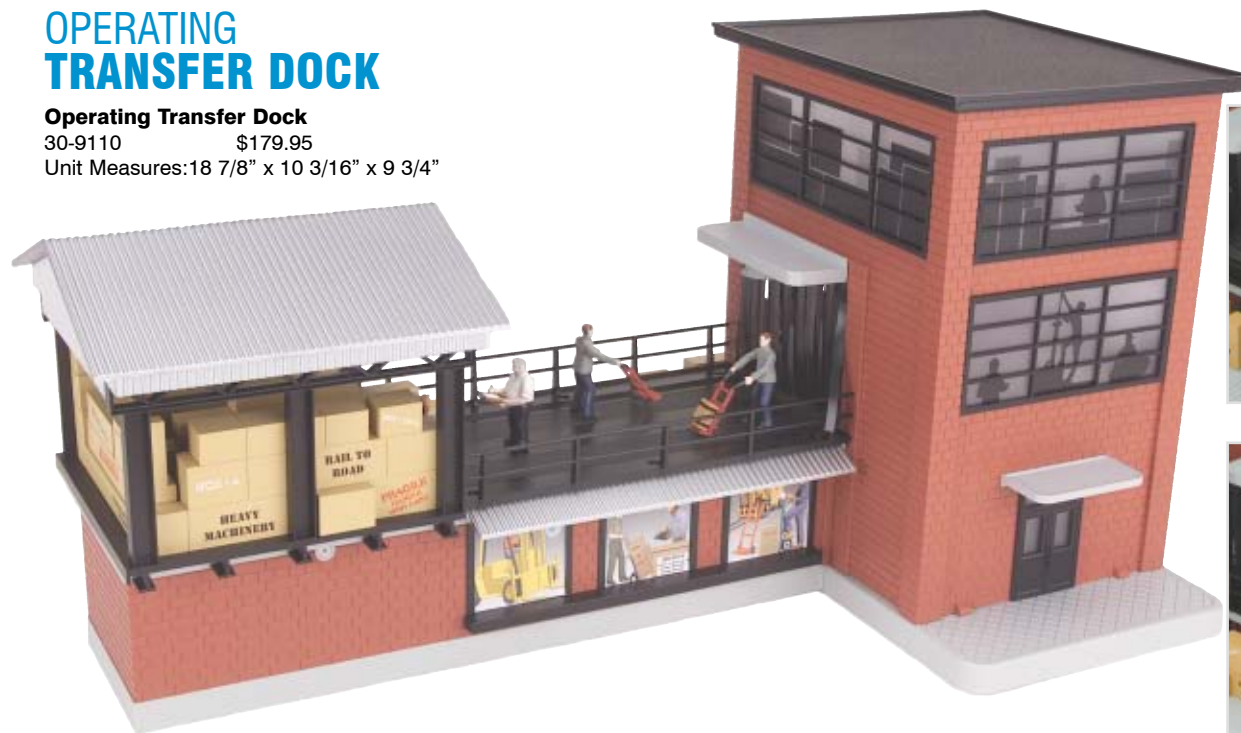

McDonalds® - Operating
30-9114 \$179.95
Unit Measures: 17" x 17" x 7 3/4"

OPERATING TRANSFER DOCK

Operating Transfer Dock
30-9110 \$179.95
Unit Measures: 18 7/8" x 10 3/16" x 9 3/4"

Moving freight is what most of today's railroading is all about. The new MTH RailKing Transfer Dock is the perfect accessory to showcase your layout's freight activity.

This attractively detailed, ABS structure features a truck loading dock and elevated rail platform perfect for simulating freight movement between tractor trailer and rail car. There's lots of activity on this dock thanks to the moving dock workers who tirelessly hand truck their freight from platform to warehouse. Featuring near-silent operation and realistic movement, this fully functioning accessory comes completely assembled, painted and decorated for right-out-of-the-box use.

FEATURES:

- Intricately Detailed ABS Construction
- Fully Assembled
- Fully Painted
- Lighted Interior
- Operating Dock Workers Move Freight
- Unit Measures: 18 7/8" x 10 3/16" x 9 3/4"

JOIN THE CLUB

70-76040 2006 MTHRRC Flat Car with 45' Trailer
One-Gauge Membership is \$100.00

Basic Club Membership

60-1000 - The Basic Club Membership does not include a club car
Basic Membership is \$25.00

AS A MEMBER OF THE M.T.H. RAILROADERS CLUB YOU'LL RECEIVE:

Limited-Edition Club Car

Each year we produce beautifully decorated cars exclusively for our Club members. Members automatically receive the car that matches their Club membership (RailKing®, Premier, Tinplate Traditions™ or One Gauge) & have the option to collect the other Club cars as well.

RailWare™ Software CD-ROM

Use your computer to design track layouts, search the database of all M.T.H. products, look at our past catalogs, listen to Proto-Sound® 2.0 train effects, & much more. This CD retails for \$79.95, but is yours FREE as a Club member.

The CrossingGate™ Club Magazine

You will receive our full color Club magazines, jam-packed with product news, ideas from other members, rail history, & step-by-step articles explaining how M.T.H. technology can bring your railroad to life.

Club Card & Lapel Pin

Show the world your membership in this elite group of model railroaders with your high-quality embossed membership card & beautiful enamel lapel pin.

1st Class Mailing of M.T.H. Catalogs

Club Members get all of our catalogs earlier than all our other mailing list members via First-Class mailings, so they can order from their local train store before the best items are sold out.

Proto-Sound® 2.0 Upgrade Kits

Club members can save an additional 15% on these kits by visiting the MTHRRC web page.

Club Web Site

Visit WWW.MTHTRAINS.COM & type in your member number to gain access to the Club web site. Here you can exchange messages with other Club members, keep up with the latest news, & even build your own homepage.

CARRY ON THE M.T.H. TRADITION WITH MEMORABILIA AND COLLECTIBLES

MTH Promotional DVD

This interactive DVD is packed full of sights & sounds guaranteed to make you rethink how far the hobby of model railroading has come. You'll learn about some of the most innovative products ever produced & marvel at the sophistication of a product line unmatched by other model train manufacturers.

Previous Year Club Cars

MTHRRC members can still obtain earlier produced MTHRRC cars by visiting the MTHRRC pages on the website. Only MTHRRC members can get these cars!

A Toy Train Story

This comprehensive book is a must for collectors & other lovers of toy trains. 350 pages & 1900 color photos, hard cover. Add this book to your membership for only \$25.00 (50% off the \$49.95 cover price)!

GET THE MOST FROM MODEL RAILROADING

On-line access to the network of M.T.H. Authorized Retailers and "tools" on the M.T.H. website (www.mth-railking.com), such as the M.T.H. Product Locator, have helped many train enthusiasts locate nearby retailers, service centers or even a particular desired product for years.

Now, M.T.H.'s new on-line "Dealer Availability" finder allows customers interested in a newly-announced product to find a retailer with the item(s) on order.

In addition, M.T.H. is expanding these services with two ALL NEW programs that will provide consumers with access to retailers who provide a superior environment for showcasing and demonstrating M.T.H. products and cutting edge technology:

1. At M.T.H. Authorized DCS Demo Centers, you can now expect to see DCS and Proto-Sound® 2.0 equipped locomotives in action, find DCS in stock and learn more about this exciting command control system from experienced DCS staff members.

2. M.T.H. Authorized Mega Station Retailers are your best bet for finding the widest selection of M.T.H. products in stock when you want them. Like a DCS Demo Center, your local Mega Station retailer has DCS in stock and the know-how to get you up and running in no time.

You will find a list of DCS Demo Centers and Mega Stations on the M.T.H. website. In addition, anytime you do a search for a local retailer or a product using the Dealer and Product Locator search tools, M.T.H. Authorized Retailers who meet the DCS Demo Center and Mega Station requirements will be identified with the appropriate icons.

Even if your local retailer hasn't yet qualified for either of these new programs, any M.T.H. Authorized Retailer has the ability to determine what is in stock and can place an order for merchandise 24 hours per day. Look for any of the M.T.H. Authorized Retailer symbols (left) the next time you visit a toy train store and see the "Fun in Action!"

Not all products depicted in this catalog are production models. In some cases, the items pictured may be HO, O Scale or some other scale product. All item's graphic features and content are subject to change after publication. All product features may be verified on their retail packages. M.T.H. Electric Trains is in no way affiliated with any of the railroads featured in this catalog.

A quick trip to the M.T.H. website will result in a wealth of information on M.T.H. products from a site that was designed to give the visitor easy access to all things M.T.H. Here you will find a complete list of M.T.H. products, an easy-to-use product locator, and tons of news and information on M.T.H. You can even watch videos of M.T.H. products in action!

SERVICE INFO

Our Service Page is your direct link to the M.T.H. Tech Support Team. Register your warranty, find a local service center or submit a product specific question here. You can even place a parts order through our secured server. It's easy and quick like it should be when you're looking for answers.

PRODUCT LOCATOR

The most popular section of the M.T.H. website can be found here. This is where visitors come looking to locate a particular product within the vast M.T.H. Authorized Retailer network. Developed in 1999, no other manufacturer has yet created a service like this for their customers. With over 7,000 items in the M.T.H. product line, this tool is your best bet for finding a hard-to-get M.T.H. item.

VIEW A CATALOG

The latest products featured in each M.T.H. catalog can be seen here. This is a popular destination for customers waiting for a new catalog to arrive in the mail. Sign up for our free electronic newsletter and you'll be notified when a new catalog has been posted online. You'll have all the news and details before any of your friends.

SHIPPING SCHEDULE

Keeping track of all those M.T.H. items would be an impossible task without our online shipping schedule. We update the schedule every week with the latest monthly releases. You can access this information directly or from the Product Locator section.
