

# Operating No. 787 Log Loader

Item Number 30-9119

The Rail King Operating Log Loader adds exciting action to your logging railroad. When in operation, the Log Loader scoops up one log at a time from the platform base, the carriage and hook rise, and the log is dropped into a car waiting below.

It is easy to operate the Log Loader when

## Wiring the Log Loader:

After positioning and mounting the log loader onto your layout (use the screw holes in the corner of the base):

*Note: The log loader needs 14V to operate properly.*

## Set Up:

Place the logs on the base, centered so that the lifter can raise them one at a time for the

paired wires to  
each thumb screw

## Operation:

Press and hold the button to operate the log loader. Once you release the button, the accessory will stop operating.

### CAUTION: Electrically Operated Product:

Not recommended for children under 10 years of age. M.T.H. recommends adult supervision with children ages 10-16. As with all electric products, precautions should be observed during handling and use to reduce the risk of electric shock.

**WARNING:** When using electrical products, basic safety precautions should be followed including the following:

- Read instructions thoroughly before using this device.
- M.T.H. recommends that all users and persons supervising use examine the hobby transformer periodically for conditions that may result in the risk of fire, electric shock, or injury to persons, such as damage to the primary cord, plug blades, housing, output jacks or other parts. In the event such conditions exist, the transformers should not be used until properly repaired.

As with all electrical appliances, this product should not be left in operation when unattended.
